Miners Voting on Affiliation With U.M.W.A.

Meeting Held on Sunday Results in
Decision to Take Ballot—Operated
Under Home Local
Since 1932

Following the break-up in May, 1932, of the Mine Workers' Union of Canada, in Coleman, Local of the Union, the mine workers in McGillivray and International mines have carried on under what in mining circles is termed a "home local," having no affiliation with any national or international organization.

In the earlier days of the industry in the Crow's Nest Pass, all mine workers in Alberta and Eastern British Columbia were affiliated with District 18 of the U.M.W.A., whose headquarters were in Indianapolis, Ind.

It was about 1925 when a rival organization came into being in Canada, known as the Mine Workers' Union of Canada. Miners in the Crow's Nest Pass broke away from the American organization, and the Canadian union functioned in this town until 1932. During 1931 a vote was taken among the miners to decide if the Canadian union would affiliate with the Workers' Unity League, a Communist controlled organization, and the vote carried in favor of affiliation. During the year 1931, following the affiliation, frequent short period strikes were called and an air of general discontent developed, culminating in a strike which started in International mine on March 15, 1932, and in McGillivray mine March 19. West Canadian Collieries workers were also on strike.

Moderate workers in Coleman decided to oust the officers of the Local union, being dissatisfied with its affiliation with the Unity League, with the result that at a meeting called in the hall, a climax was reached when the Unity League union officers were unseated and a new committee, free from disorder and a near riot, several suffering minor injuries in the melee.

A local union under the name of Coleman Miners' Association was then organized, and agreements made with the mining executives by duly elected officers of the home local. In the past five years repeated efforts have been made by R. Livett, president of District 18, U.M.W.A., and Angus Morrison, secretary, to have a vote taken on the local mine workers again becoming a local in the international organization, which is one of the unions under the leadership of J. L. Lewis, head of the C.I.O.

At a meeting held in the hall on Sunday last, a vote was taken of those present and it was decided to have a pit-head ballot to find if opinion is favorable towards affiliating with the U.M.W.A.

The vote is to be taken by ballot on the first day both mines are working.

Officers elected in 1933, it is of interest to recall, were as follows: For McGillivray—D. Gillespie, Harry Garner, Ernest Houghton. For International—W. J. White, J. Ramsey, Steve Krywzy. The meeting was held on May 19, 1933, reference to The Journal files show W. J. White being appointed president and D. Gillespie secretary, a standing vote of confidence being taken, which was unanimous. These committees were provisional until the organization of the new local association was completed.

NOTATIONS TO NAVY LEAGUE

Making his annual canvass for subscriptions, Fred Cooke, organizer of Alberta division of the Navy League of Canada, received the following amounts: Blairmore \$23; Coleman \$17.50; Frank \$3. The money is used to assist widows and orphans of the men of the merchant marine, maintaining sailors' homes in Canadian ports, and training boys and young men to make them better Canadian citizens.

DO THEY READ 'EM?

250 replies were received locally in answer to a classified advertisement for a housekeeper wanted. No dear friends, not in The Journal, but in The Lethbridge Herald. Who says people don't read the classified columns? And they read The Journal's too! Try a classified today.

SALVATION ARMY MUSIC AT OPEN AIR SERVICES

With a portable harmonium, the open air service of the Salvation Army are creating interest. Lieut. Hewitt, recently arrived from Toronto, is the player of this sweet-toned instrument, and Captain Mattison is in charge of the local corps. Quite a number of young people help in the work of the corps, and the officers also hold services in nearby towns.

Home improvements continue steadily and local contractors have been busy for some time. As winter approaches many who have deferred making improvements make hurry-ups to carpenters and contractors, with the result that some are disappointed.

Alberta Weekly Editors in Annual Convention

Maintenance of Ideals of Freedom and Liberty of All The People Was Keynote of Important Gathering.

October 8 and 9 at the Macdonald Hotel, Edmonton, was the time and place of one of the most momentous conventions held by Alberta Division of Canadian Weekly Newspapers' Association, presided over by H. T. Hallwell, of the Coleman Journal.

CECIL LAMONT

Manager of Grain and Milling Advertising Service, Winnipeg, who donated the trophies for the Better Newspapers Competition, and \$50.00 cash prize with each, of which the Journal was awarded one.

Threats of press control and attempted boycotts drew the publishers solidly together in a demonstration that they would not be subject to the curtailment of those liberties for which people in past centuries have fought and died, and a resolution was telegraphed to Premier King at Ottawa, affirming their determination to maintain the high ideals of democratic freedom of which the British Empire.

For the first world of the province and from the south editors and their wives assembled for two days of social events interspersed with social events as guests of the daily newspapers of Edmonton and the printers' supply houses of Calgary and Edmonton.

The weekly press by its staunch attitude in favor of the advancement of the civil rights and liberties of the people has earned the commendation of people of all parties, as demonstrated by the messages and telegrams received during the convention.

The reports of the various officers reviewed the unfriendly relations caused through the actions of Fred Hall, of Alberta, how he had ignored representations made by the association, never seeking their advice in the drawing up of his famous press control bill, how the brief submitted by the publishers was simply ignored and even opposed by the legislature.

Publishers were unanimous in declining to accept so-called news matter from the "information bureau" of the government, which has proved a propaganda in favor of the Social Credit movement.

President Hallwell reported on his attendance at the annual convention of the Dominion association in Halifax, and pointing out the keen interest of the eastern members in the attempted suppression of Alberta editors, and of their resolution condemning and placing themselves in uphold them in their fight. British Columbia division of the C.W.N.A. was in convention in Vancouver at the same time the Alberta division convention was in progress, wired their resolution of support.

Coleman Wins "Pass" Schools Track Shield

Harry Thomas Star Winner With
31 Points—Locals Win Six of
Twelve Medals Awarded.

At the Pass schools track meet held at Blairmore stadium on Friday, Coleman scored its first victory in ten years of competition. A significant feature of the results shows Coleman winners in points in Classes A, B and C. Besides winning the championship Coleman athletes garnered six of the twelve medals given to the individual aggregate winners and runners-up.

Credit must be given to the fine display of team work of Coleman track team and the outstanding athletes are to be congratulated in winning honors for their school. It is hoped that this victory will be the means of instilling a new athletic spirit among the school children.

Team work was particularly shown in the relays where Coleman scored four victories and won second and third in the remaining two others.

Coleman Track Team, Class A—H. Guimond, I. M. Myssnick, S. Manovich, A. Davidson, H. Geddes, J. Lipka, W. Godfrey, H. McGillivray, F. Grishin, J. Moore, B. McEwan, N. Polski, L. Henriette, A. Ancelot, Class B—U. DeMartin, L. Snider, L. Antel, E. Henriette, I. Devine, I. McLeod, H. Thomas, M. Kovac, D. Russell, J. Goldring, M. Harry.

Class C—M. Tennis, O. Brown, I. McDonald, E. Johnson, V. Brown, F. Slagle, E. D'Appolonia, R. Emmerson, D. Jones, F. Sharp.

Aggregate points won by classes in each school are as follows:

Personality In Education

Too much stress cannot be laid upon the importance of the personality of the teacher as the chief integral factor in the educational systems of Western Canada if these systems are successfully to bear the burden which has been imposed upon them to lay the foundation of a virile and basically sound citizenship.

It is not enough that the teacher be erudite or that he or she be thoroughly grounded in the principles of psychology and methodology. It is not even sufficient that the pedagogue, to use an old fashioned term, be an expert in the art of imparting knowledge to his or her charges. The teacher may have all these essential attributes and yet not have the personality necessary to inspire character, without which education is but a mere shell.

Personality has been defined as "that quality which constitutes a distinction of persons, distinguished by some characteristic individuality. Personality implies complex being, being characterized having distinctive and persistent traits, among which reason, self-consciousness, and self-activity are usually reckoned as essential" and Coleridge defined it as "individuality existing in itself but with a nature at a ground."

With these definitions as a background in the mind, the importance of personality in those who are charged, along with the parents, with the development of a future race which is as yet in the melting pot stage, can scarcely be exaggerated.

For it is axiomatic that as the twig is bent so will the tree become, and the twig will be bent as the teacher wills and directs it, consciously or unconsciously, and the determining factor in this process is the teacher's personality rather than his precept.

The success of the public school system of Great Britain is based upon the knowledge of the importance of this influence and the effect that the personality of the teacher will have upon the character of the pupils under his care. It is because of this that personality is regarded as the fundamental qualification, though not the only one, for headmastership in the great public schools of the old land.

Over there it is well known and recognized that the personality of the teacher will leave an indelible impress on the pupil, an imprint which will glow throughout life and will dominate thought, word and action until the closing scene.

And within that is a natural sequence of submitting young and impressionable minds to the guidance of one individual for many hours a day in the formative period of youth.

Three important elements enter into the scheme of the education of youth. They are matter, method and personality. The first two have a relative importance in the educational structure, but without the last-mentioned, enduring results could only be insignificant, almost to the zero border.

Sometimes in the controversies which arise from time to time over the subjects which should be taught in the primary and secondary schools and the manner in which these subjects should be presented to the inquiring mind, the fact that the personality of the teacher and his influence on character building transcends the mechanics of education, is minimized or overlooked altogether. Of far greater importance to the future of the student and of the nation in which will take his place, is what he will be, than what he will know or how he learned what he will know.

Good progress in this direction has been made in this country to date, despite the fact that this country is so young and has had to build up an educational system at short notice, and it is to be hoped that the distractions of economic and restless conditions will not be permitted to call a halt in the march towards this important objective and that as the primary objective it will not be forgotten.

In post-war years important strides were made in the educational systems of the country. Academic and professional standards were raised and other restrictions were imposed which, along with improved remuneration for teachers, served to make the teaching profession more attractive than it had been in the earlier days when it was used, more often than not, as a stepping stone to other spheres of work or to marriage.

The more recent difficult years of drought and depression, however, the principal objective of custodians of the schoolhouse has necessarily been towards keeping the school open, all the time if possible, and if not, at least part of the school year. Makeshift measures have had to be adopted, but despite the handicaps imposed by strenuous conditions, in the great majority of instances, teachers, trustees and ratepayers have strained the utmost of their meagre resources in a valiant effort to live up to their obligations to the future generation.

During this period the teachers have in a substantial measure sacrificed a great deal to continue true to their trust and for their sakes as well as for the sake of the children it is to be hoped that the end of these difficult years lies in the immediate future and that ratepayers and parents will again be able to press further without serious encumbrance towards the goal that it so essential to the progress of the country—a well equipped schoolhouse and means to adequately recompense a teacher with a personality.

A Common Failing

Treatment Of Sickness

Many People Do Not Get Much Out Of Life

During the past two years, writes William Moulton Marston in the *Reformer Magazine*, I have asked 2,697 persons, "What do you live for?" I discovered that 94 per cent. are merely enduring the present for some future event or condition. Poor souls! They are wasting to-day's realities for tomorrow's speculations, sitting bored at a great entertainment, waiting for a better show which may never open. It's a common failing.

The ocean waters of the world contain about 25 trillion dollars' worth of gold in suspension, according to the estimates of scientists.

Franklin Was Right Engineers Prove Lightning Rods Are Great Protection

Benjamin Franklin's fame seems certain to go on forever. In the whole history of science no other figure has grown so steadily in stature after death. Nearly two centuries ago Franklin invented the lightning rod. Ridicule, over-enthusiastic acceptance, exploitation by the unscrupulous—all have been the lot of that device. And now come the pronouncements of engineers with all the latest scientific instruments to prove that almost everything that Franklin believed and said about his lightning rod was right. The chief difference is that importance of the rod has changed ends. Instead of the branch-end, pointed and gold-tipped upper end on which lightning rod salesmen used to set such store, modern experts are more concerned about the bottom.

At the laboratories of the General Electric Company at Pittsfield, Mass., where artificial lightning has been a plaything for several years, K. B. McEachron also has inquired into the freaks of natural bolts. One recent instance is instructive. A recent bolt struck a tree forty feet from a bungalow where a boy was standing at the window. The house was not struck, but the boy was killed. What happened, Mr. McEachron deduces from fingerprints of lightning along its path, was that the bolt followed one root of the tree, got from that into a small stream of rainwater, followed this to the foundation of the house and then struck up through the unfortunate youngster. From his chest, the bolt jumped to a nearby metal saucepan, thence to a radio antenna, next to electric wires leading to a neighboring building and finally to the telephone system, through a wire hanging near an electric lamp. The telephone system, at last, proved equal to the strain, and led the lightning off into the ground.

From the lightning's viewpoint this freakish path was simple and direct. The bolt was seeking the smoothest way into the ground. Ground under the tree was too dry, hence the path by root and stream into the bungalow. Hence, also, the importance of the lower end of a lightning rod, where its buried tip or metal end plate is close to ground, as Franklin long ago realized it should be. Safest of all places in a storm is to be inside a lightning rod with its lower end thoroughly grounded.—New York Herald Tribune.

The Bluenose Challenged

Race May Take Place Off New York In 1939

We have still our old Bluenose, a boat which has stirred the Bluenose pride, whose graceful lines are still a thing of wonder, whose likeness adorns the dunes and whose picture on one of our special postage stamps has commanded the admiration of philatelists throughout the world, so much so, that some of them go the length of saying it is the most beautiful stamp of all the collections. Despite the struggles the boat has had with wind and tide and accident, she still carries on and does her daily dozen.

And now Ben Pine, skipper of the *Bluenose*, comes forward to challenge his old antagonist, Angus Walters, to again try conclusions with the Bluenose, suggesting the race take place off New York in 1939 at its great World's Fair. This will give adequate time for preparation, provide a safe stage on which to run the race, and will be an attraction to all the lovers of salt water and those who sail it. It should not be difficult to so arrange and there will be the widest general approval.—Halifax Chronicle.

Something To Puzzle Over

How long is a piece of string, and why I ask for it, I do not know, but I am not able myself to supply the answer. The question, I am assured, by one who had to cope with it, has just been put in an examination for candidates for prison wardenships. It may, of course, have been a species of intelligence test. Capacity to deal with such a problem would no doubt argue ability to face most crises in life successfully.—London Spectator.

Capital Is Right

On being asked to write down a definition of "capital punishment," says the Christian Science Monitor, a Glasgow schoolboy submitted this: "Being locked in an ice-cream or chocolate factory for a week-end would, in my opinion, be capital punishment."

Great Britain reports a boom in recruiting for the territorial army.

Monkeys are relished by large eagles of the tropics. 2225

USED TO WAKE UP WITH A HEADACHE

Now Fresh and Lively Every Morning

Here is a man who woke up every morning with a dull headache. Then Kruschen transformed his days. Read his letter:

"I used to wake up in the morning with a dull headache. A year ago, I started taking Kruschen regularly. Today, I wake up fresh and lively and can do my day's work without any exertion. I can remember Kruschen for anyone suffering from headaches and constipation, from rheumatism and gout. I am now 70 years old and I intend to continue with Kruschen for the rest of my life."—E.P.

Headaches can nearly always be traced to the disordered stomach and to the unimportant retention in the system of stagnating waste material which poisons the blood. Removal of these poisons prevents the formation of a headache. You never need to worry any more. And that is just how Kruschen Salts brings quick and lasting relief from headaches.

Might Prove Beneficial

Fresh Will May Result In Modern Inheritance Bill

A husband who bequeathed his wife the equivalent of seven cents to purchase a noose, and added a hope she would make use of it without delay, may ultimately prove to be a benefactor.

The strange request at least has sent a group of parliamentarians into action to put an end to wills that disinherit wives and children.

Miss Eleanor Rathbone, independent member of Parliament for the combined English Universities, a delegation will wait upon Prime Minister Chamberlain to urge the introduction of a modern inheritance bill.

The strange request at least has sent a group of parliamentarians into action to put an end to wills that disinherit wives and children.

For years members of Parliament have urged all parties have sought to bring English law into line with legislation prevailing in Scotland and some of the dominions.

Proponents of a new inheritance bill declare incidents of eccentric bequests are all too frequent. Here are two cited:

A London man directed that his wife should be given "one pair of my trousers, free of duty and carriage paid, as a symbol of what she wanted to wear in my life-time—but not it."

Another left his widow the sum of one farthing to be sent her by post in an unstamped envelope. As the letter contained coin and was not registered, the woman had to pay a registration fee of eight pence in addition to two pence for excess postage.

ALICE STEVENS' RECIPES

HOUSEHOLD HINTS

If you pulled candy seems at sticky, roll the pieces in icing sugar. This prevents them sticking together.

When rinsing out old clothes in London a short time ago he started a flock of armchair runners figuring out once more how soon it will be before someone runs the miles in four minutes flat. Wooderson's mile was made in four minutes, six and six-tenths seconds, which is just one-fifth of a second faster than the old mark held by Glenn Cunningham, of Kansas, the United States titleholder.

It has taken the great foot runners of the world just 22 years to shave six seconds off the mark. If they keep up the same rate of progress it will be around 1940 before we come down to the four-minute mark. Back in 1915 Norman Tabor, of United States, held the world's mark at 4.12 3-5.—Winnipeg Free Press.

Gifts For Royalty

Send From Toronto To Queen Elizabeth And Her Daughters

The two beautiful embroidered purses for the Princesses Elizabeth and Margaret Rose, and chiffon handkerchief for Queen Elizabeth, which were the work of Mrs. S. Maloy, 131A Booth avenue, Toronto, and presented on her behalf by the Canadian National Exhibition, have been sent to Buckingham Palace.

The fine examples of Canadian needlework for the Queen and the Princesses were officially taken over by E. W. Scott, representative of the Canadian National Exhibition, on the 10th of May.

Mounted for shipment on the Duchess of Bedford. The package was addressed to G. H. Ward, Canadian National Exhibition representative, in London, who arranged for its delivery to the Royal Family.

The handkerchief for Queen Elizabeth is of pale rose embroidered with the King George Carnation, the Scottish thistle, the Bows-Lyon crest and the jeweled sceptre and crown. The little moire bags are of the latest design and are embroidered with the rose, thistle and shamrock, acorns, and oak and maple leaves. The one for Princess Elizabeth is more elaborate than that of Princess Margaret Rose and has a Royal Crown done in gold and Jewel colors, whereas that of Princess Margaret Rose has a coronet.

Has Taken Many Years

To Shave Six Seconds Off The Mile Run Record

When Stanley Wooderson, a spinster English runner, smashed the world's record for the one mile run in London a short time ago he started a flock of armchair runners figuring out once more how soon it will be before someone runs the miles in four minutes flat. Wooderson's mile was made in four minutes, six and six-tenths seconds, which is just one-fifth of a second faster than the old mark held by Glenn Cunningham, of Kansas, the United States titleholder.

It has taken the great foot runners of the world just 22 years to shave six seconds off the mark. If they keep up the same rate of progress it will be around 1940 before we come down to the four-minute mark. Back in 1915 Norman Tabor, of United States, held the world's mark at 4.12 3-5.—Winnipeg Free Press.

Funeralism Was Dramatic

How a village committee in India changed a man for marrying a woman of lower caste is reported from the Village of Rangpur, near Shimor State. First the members of his caste tried social ostracism, but the village treated the boycott with contempt. So the committee held a midnight meeting at which it was decided that the man's breach with caste rules should be punished with death.

Now German military scientists are discussing the possibilities of organizing war on civilian populations. That "next war" is getting nicer and nicer.

The accordion, smallest member of the organ family, produces the greatest volume of sound, for its size, of any musical instrument.

The bee is well named.

Mammot Cave, Kentucky, has five levels, with 225 explored avenues 47 domes, three pinnacles, three rivers, two lakes and one sea. The actual space worked out of the limestone, according to estimates, embraces 12,000,000 cubic yards.

It has been found that bees sting hurt worse in the fall than in the spring.

WATCH OUT FOR YOUR LIVER!

And You'll Always Great

Do you often say, "feel rotten"—fired out, no pep, hate to get up morning, grumpy headache, nervous constipation. The reason is that your liver is not working. A liver that is not working properly things, it applies the body's natural laxative, puts proper nourishment in your blood, helps the kidneys, intestines and stomach. It is unhealthy if your system is poisoned and out of order. "Fruit-a-tives," made from fruit and herbs, extracts, are a quick, safest and most natural way of restoring your liver to health. A celebrated doctor's formula. See you like a new person. Try Fruit-a-tives, 25c, 50c, all drugs.

FRUIT-A-TIVES LIVER TABLETS

Engine Driver Retires

Engineer Of British Railway Had Long Record

George Stone, engine-driver to three kings and master of railway engines, has retired after more than 50 years service with the London, Midland and Scottish Railway.

Although 65 years old, he was known as "Young Stony," a nickname bestowed on him more than 40 years ago to distinguish him from his father, also a long-service engineer. One of his chief regrets in leaving the footplate was that his service could not be extended another 13 months. That extra month would have given him and his father 100 years of service between them.

Here are some of "Young Stony's" notable achievements:

First man to drive a railway train non-stop from London to Scotland; fireman on the first all-corridor express to leave Euston Station in 1883; drove three kings—George V, Edward VIII, and George VI.

"In 50 years I've learned to love engines and shall hate to leave them," he said. "You can sell an old motor car and buy a new one with a thought, but it makes me sad to see the old engines go when they're gone. It's like losing a trusted friend."

In his 37 years behind the throttle Stone did not have an accident. Showmen Are Worried

Freaks For County Fairs In Britain Are Scarce

Showmen of Britain who organize the countless fairs in country towns and villages are complaining of a shortage of freaks. They are seeking new ideas and were startled to learn at their annual meeting in London that there was a general scarcity of even the older variety of freaks. The chiefs of the fair industry are sending men to scour the country for attractions. In particular, there is a dearth of "India rubber men," those queer creatures who stretch their skin in sideshows.

Cave Is Well Named

Mammot Cave, Kentucky, has five levels, with 225 explored avenues 47 domes, three pinnacles, three rivers, two lakes and one sea. The actual space worked out of the limestone, according to estimates, embraces 12,000,000 cubic yards.

It has been found that bees sting hurt worse in the fall than in the spring.

TRY THIS NEW
WAXED TISSUE PACK

PRESTO-PACK

Wrap Your Food

YOU'LL be delighted with the simplicity of Presto-Pack for a flat pack of waxed paper for kitchen use. Just hang it up on the wall. Then pull one sheet at a time as you require it. You can't pull any more because of the ingenious way it's packed.

Try Presto-Pack today in the kitchen. It's the handiest thing in the kitchen. Appleford Paper Products Limited, Hamilton, Ontario

Sanctions Against Japan Proposed At Ottawa Meeting

Ottawa.—Sanctions against Japan were proposed by the steering committee of the League of Nations society's committee of national participating organizations at a meeting Saturday, it was announced.

The committee's stand will be sent to all of the society's 36 national member bodies and they will meet here Nov. 6 in special session with the society's national executive committee to determine further action.

Five national organizations which constitute the steering committee were represented at Saturday's meeting. They were the Dominion command of the Canadian Legion, the Canadian Teachers Federation, Council for Social Service of the Church of England in Canada, National Council of Women, and the Trades and Labor Congress of Canada.

Concentrating on governmental and international action, the committee urged Canada to state to the forthcoming nine-power conference that, failing a peaceful settlement, it was prepared to carry out its duties under the covenant (these duties include economic sanctions, withdrawal of diplomatic representatives and assistance to China). And that it was "ready in particular to join in whatever measures may be wise and effective for putting a stop to the aggression provided that other League of Nations signatories, the United States of America, co-operating, are ready to do the same in sufficient numbers to make the action effectual."

R. B. Inch, the society's secretary, reported to the committee "wide-spread evidence that many individuals in Canada, faced with the failure of governments to honor effectively their obligations, are boycotting Japanese goods, and in this, the only way at their disposal, are discharging obligations which they, as well as the government, owe to China and the world community."

Support For Airways

Route From United States To Alaska Via Alberta Is Advocated

Lethbridge, Alta.—Support for the "inside" airways route from the United States to Alaska, via Alberta, connecting with Canadian mail and transport flights, was voiced at an international conference here.

Called by the city of Lethbridge and the local board of trade, it was attended by delegates from Edmonton and Calgary, from Great Falls, Montana, and the states of Utah, Idaho, Colorado, and Wyoming. Large transport planes brought the delegates from the United States.

Both the United States and Canadian governments, it was understood, will be petitioned for support of the "inside" route for the carriage of mails of both countries.

Reduce Wheat Consumption

Rome.—In order to reduce Italian consumption of wheat flour, part of the flour used in bread will henceforth have to be of some other grain, it was announced. The percentage of wheat flour, however, will not be less than 90 per cent. Experiments are being conducted to see what grains can best be mixed with wheat flour.

Research Fund

Toronto.—Russell Nesbitt, Conservative candidate, has made formal application for a recount of votes in Toronto—Bracondale constituency, cast in the October 6 election. Unofficial returns election night showed Nesbitt was defeated by the Liberal candidate, Lionel Conacher, by 47 votes.

Police In Jerusalem Suddenly Clear

Jerusalem.—Seven persons were killed in Palestine in a new wave of death and terror. Three lost their lives when a land mine blew up a Haifa-Lydia train near Kalkilieh, 20 miles northeast of Jaffa. A policeman was reported to have killed two Arabs when they failed to halt near the scene of the wreck.

Earlier an Arab was killed and three Jews wounded by a bomb explosion in a suburban bus and another Arab was killed when a second bus was ambushed. Six Jews were wounded when snipers ambushed a bus.

A Jew was shot and wounded on the Jerusalem-Jaffa road when his automobile was attacked.

The Syrian-Palestine border was closed to all traffic as a precautionary measure.

Police in Jerusalem suddenly cleared the streets of traffic and well-informed sources predicted martial law would be proclaimed shortly.

Following the train wreck near Kalkilieh, an armored railroad car loaded with soldiers equipped with machine guns and searchlights plotted a train bearing the first battalion of the Royal Sussex regiment to Egypt. Numerous rifle shots were fired at the train from nearby hills but no casualties were announced.

Shots were fired earlier at a police truck near the Talafera barracks where the second battalion of the Black Watch (Royal Highland regiment) relieved the Royal Sussex regiment battalion.

A report from a Jewish settlement in the Beisan valley said an oil pipeline had been pierced in two places and ignited.

Former Premier Of B.C.

Dr. Tolmie Dies At His Residence In Victoria At Age Of 70

Victoria, former premier of British Columbia, minister of agriculture in two federal cabinets and five times a member of the House of Commons, is dead.

Death came to Dr. Tolmie at the family residence at Cloverdale, just outside Victoria. He had been ill for the past few months.

Premier of British Columbia from 1922 to 1933 when he was practically drafted by the provincial Conservative party to "forsake Ottawa, where he was Dominion organizer for the party, Dr. Tolmie was Conservative member for Victoria in the House of Commons, his fifth term in the federal house.

Dr. Tolmie was born in Victoria, Jan. 25, 1867, the son of Dr. William Tolmie, a physician and Ward Tolmie. His father was member of the legislative assembly of the colony of Vancouver Island before it merged with the mainland to form the present province of British Columbia.

Educated in Victoria, elementary and high schools he went to Toronto, where he attended the Ontario Veterinary College.

On his return he became British Columbia inspector of animals at a salary of \$7 weekly. His work with livestock soon won him the respect of his associates and he later became inspector of animals for the Dominion government as well.

May Close Plant

Ford Motor Company Tired Of Labor Troubles In Kansas City

Detroit.—The Ford Motor Company, charging an "intolerable" situation has arisen because of the picketing of its Kansas City plant, indicated it was considering closing the plant permanently.

"I do not think there is anything to do but close the plant," said Harry H. Bennett, personnel director, "but that is up to the company. We can't get police protection. The Ford Motor Company doesn't work that way. As far as I'm concerned, if I have anything to say about it, we're all through in Kansas City."

Officially it was acknowledged as a corollary to the Franco-British declaration of April 24, which absolved Belgium of her Locarno treaty obligations to fight for Great Britain or France if either became the victim of aggression.

For Special Emergencies

Call Of Blackshirt Volunteers To Color Is Reported

Home.—The reported call of 50,000 blackshirt volunteers to the colors as preparation for "special emergencies" raised the question in Italian minds whether the Fascist high command is planning to send new legions to the aid of the Spanish insurgents.

Sources usually well informed said they believed Spain would be the destination of at least part of these volunteers, ostensibly called for East African service as well as emergency.

These informants declared part of the new militia regiments would be held in Italy while others are sent to Africa.

Applies For Recount

Toronto.—Russell Nesbitt, Conservative candidate, has made formal application for a recount of votes in Toronto—Bracondale constituency, cast in the October 6 election. Unofficial returns election night showed Nesbitt was defeated by the Liberal candidate, Lionel Conacher, by 47 votes.

Paralysis Epidemic

Toronto.—Dr. Gordon P. Jackson, medical health officer, informed board of control the infantile paralysis epidemic in the city, which started early this summer, would cost the taxpaying public \$22,799.

BRITISH STATESMEN DISCUSS SITUATION

Concerned over the Mediterranean "piracy" problem, Premier Neville Chamberlain (left) and Rt. Hon. Neville Chamberlain, Foreign Secretary, serious and thoughtful expressions when they left an emergency Cabinet meeting after sending a note to Italy concerning withdrawal of "volunteers" from Spain.

PARDONED BY FRANCO

Condemned to death before a firing squad after a court-martial trial, Harold E. Dahl, 28-year-old aviator from Champaign, Illinois, was immediately pardoned by General Franco, leader of the Spanish rebel forces.

Winter Will Aid Hunt

Arctic Flyers Will Have Benefit Of Bright Moonlight

New York.—Darkness of winter, high up in the rim of the Arctic, where six Soviet aviators are lost, will not block new attempts to rescue them. Rather, said Vilhjalmur Stefansson, Arctic explorer, it will help.

"For eight days in each of the new four months—four days before the full moon and four days after—it will be enough moonlight to carry on the search," said the explorer, a native of Arnes, Man.

Stefansson has been acting in an advisory capacity to rescue expeditions led by Sir Hubert Wilkins, Australian polar explorer, which have already journeyed into the northland in search of Sigismund Levanevsky and his five companions, missing since Aug. 13 on a flight from Merrow to the United States.

The explorer said he believed the final flights of eight Russian planes and the newly-projected sixth flight by Sir Hubert would be "almost bound" to find the lost party if the Russians can hold out through the next four months.

Except for the eight moonlit days each month Stefansson said, ink blackness will cloak the Arctic silence in the next four months.

Valuable Dogs Burned

Swift Current.—The lives of 20 dogs came to a tragic end when the building they were housed in, northeast of the city in the Riverdale section caught fire. The dogs were under care of J. McAinch and were valuable specimens, including valuable springer and cocker spaniels.

Eden Denounces Intervention In Spain And Broken Promises

Llandudno, Wales.—Foreign Secretary Eden, in a new call for a real effort to settle the present armed intervention in Spain, demanded "proclaimed intervention and glorification of breaches of agreement."

"In such a condition, no one can complain," he declared, "if the patience of those who have striven to keep their responsibilities toward Europe constantly before them is well nigh exhausted."

Mr. Eden said that should the non-intervention committee be unable to make progress in the matter, "then I fear that it is useless to conceal from ourselves the gravity of the situation that will confront us."

Continuing the reference to proclaimed intervention, which his hearers at a political rally interpreted as referring to Italian Premier Mussolini's messages to Insurgent General Franco and to announcements of presence of Italians in Spain, Mr. Eden added:

"For one should certainly not be prepared after criticism of any nation which, if such conditions continue, feels compelled to resume its freedom of action."

Eden stated there was a clear distinction between non-intervention and indifference.

"We are not indifferent to the maintenance of the territorial integrity of Spain," he declared. "We are not indifferent to the complications which may arise in the Mediterranean as the result of intervention by others in Spain."

"We are not indifferent to the vital British interests in the Mediterranean. A clear distinction must be made between non-intervention which is purely a Spanish affair and non-intervention where British interests are at stake."

Indirectly he condemned Fascist declarations a Bolshevik Spain could not be tolerated.

"We have said more than once that the countries have no concern with the forms of governments in foreign states," he asserted. "That is perfectly true and remains true as long as it is a general practice, that is, so long as foreign states as a whole observe this practice."

"But toleration must be general, and we have no intention to seek to make all states in Europe democracies, so others should not seek to make all states in Europe either Fascist or Communist."

Mr. Eden said history showed decisions in civil strife brought about as the outcome of foreign intervention "are not enduring."

The Duke of Wellington, who fought several campaigns in Spain, wrote more than 100 years ago, Mr. Eden said: "There is no country in Europe in the affairs of which foreigners can interfere with so little advantage as Spain."

"Perhaps there are some who now wish they had headed the Duke of

Nine Officers Drowned

Naval Bombing Plane Falls Into Sea Off Java Coast

Singapore.—Sinking Settlements—Netherlands Air Commander H. G. Debruyne and eight other Netherlands naval officers were killed when their naval bombing plane plunged into the sea off the Java coast during a night flight.

Debruyne had been recently appointed commander of the Netherlands-India air service and was stationed at the flying base at Soerakaya, Java.

Hunt With Bows And Arrows

Winnipeg.—Even the Indians think they're goofy, but two American hunting parties in Winnipeg have been having a lot of fun by taking bows and arrows into northern Ontario big game territory. Roy I. Case of Racine, Wis., who has been hunting in this fashion for seven seasons bagged a deer this trip—at 25 yards.

Says Britain Desires To Live At Peace With Other Nations

Manchester.—Prime Minister Chamberlain stated the government's proper function in relation to industry was to create conditions under which trade and commerce could most successfully be carried on, while exercising only "so much control as may be necessary in the public interest."

Addressing the association of British chambers of commerce here, the prime minister touched briefly on foreign affairs. "The desire to live at peace with our neighbors" was the mainspring of Great Britain's foreign policy, he said.

"It is not in a temperance of our people to bear malice," he added, "and I think we have the shortest memory for quarrels of any nation in the world."

Were Great Britain to be attacked "we should know how to defend ourselves as we always have done in the past," but "if we are straining—as we are night and day—to rearm ourselves, it is not that we have sinister designs against anybody else."

"Sometimes we are credited with not being as Machiavellian as we are," the prime minister continued, "but the simple fact is that the mainspring of our foreign policy is the desire to live at peace with our neighbors and to use our influence

enough to induce them, if we can, to resolve difficulties by peaceful discussions and not to resort to war."

"I doubt whether our foreign policy ever was less aggressive than it is to-day."

Even as the voluntary system was best for the British empire forces, he said, it was preferred to compulsions on toward industry.

"We try to exercise the minimum control consistent with prevention of any abuse," he declared in outlining the government's attitude toward business. He referred to the evolution of a system of adjusting wages through boards of trade, and minimum wages as examples of this theory.

The prime minister doubted whether industry was spending enough toward research. "Our task is to find new lines of manufacture and these can only be successfully established by intensive research and full utilization of the results of this research," he said.

The modern British businessman recognizes he has a responsibility toward the state as well as toward the business he controls, the prime minister added. "And it is perhaps in the interest of the success of our democratic institutions. So long as that remains true, we may be sure those institutions are not in any danger."

Lives Lost When New Wave Of Terrorism Strikes Holy Land

Jerusalem.—Seven persons were killed in Palestine in a new wave of death and terror.

Three lost their lives when a land mine blew up a Haifa-Lydia train near Kalkilieh, 20 miles northeast of Jaffa. A policeman was reported to have killed two Arabs when they failed to halt near the scene of the wreck.

Earlier an Arab was killed and three Jews wounded by a bomb explosion in a suburban bus and another Arab was killed when a second bus was ambushed. Six Jews were wounded when snipers ambushed a bus.

A Jew was shot and wounded on the Jerusalem-Jaffa road when his automobile was attacked.

The Syrian-Palestine border was closed to all traffic as a precautionary measure.

THURSDAY, OCTOBER 21, 1937.

NOTES AND COMMENTS

CRANBROOK proposes to celebrate the 40th anniversary of the entrance of the Canadian Pacific Railway into that town. It was in 1889 that the "Crows' Nest" line was built into that city. Some years later the Kettle Valley railroad was built, thus providing a rail outlet to the coast alternative to the main line of the C.P.R.

THE BUILDING of this line provided transportation facilities for the mining industries of the "Crows' Nest Pass," also the industries at Kimberley and Trail, owned by Consolidated Mining & Smelting Co. The lumbering industry of those days also greatly benefited. Incidentally it is sad to reflect that through lack of timber conservation, and because of the ravages of fire, the lumbering industry has almost vanished.

PRIOR TO the coming of the "Crows' Nest" line, pack trails were the only method of transportation through this section of the Rockies. A few of the old timers who travelled these trails are still alive. Coleman's link with the old trails is Joe Planté, who as a young man travelled with his father bringing up bands of horses from across the international boundary. He can tell some interesting tales of the long treks and camping in the valleys, the while keeping tally on the large bands of "brones" which were sold to the early farmers on the plains further east.

THE RAILROAD gave a great impetus to coal mining in this region. It was before the days of oil and natural gas. Mines were working capacity shifts, payrolls were large, and life was probably more wild than now. In other parts of Canada the "Crows' Nest" Pass was regarded as "tough," now it is settling down to conventional ways of life. The mining towns are no longer the stamping ground of the carefree and the wanderer; married men predominate, who have made homes and who now send their children to universities to engage in higher branches of study.

THE OLD friendly spirit of the west still remains in the hearts of those who were here forty years ago. They look back with pleasure on those days, when the only representatives of law and order were the mounted police, who rode their horses on long patrols, who were indeed the "Riders of the Plains" and the mountain trails as well. Now the motor car has supplanted the old romance attaching to the famous force.

CRANBROOK is to be commended for its plans to celebrate the 40th anniversary of what might be termed the birth of the era of settlement. Reviewing the intervening years, it but serves to show how important a part the railroad has played in settling the west. It made accessible regions that would have remained wilderness; it facilitated the development of industry on a big scale, and provided transportation facilities whereby people could travel in comfort and view the grandest scenery in the world. We wish Cranbrook every success in its plans to celebrate the arrival of "steel."

ENLIGHTENMENT as to the type of publicity material the provincial government would issue to newspapers through its "Information Bureau" is given in an extract printed from the High River Times to which the attention of readers is referred. It serves to indicate the legal mental type of some of Alberta's legislative members, and the use they would make of the press were the muzzling measures to become effective. Well might the people of Alberta uphold the slogan of the weekly newspapers for a free press. Never did they descend to the low level to which legislative members have stooped. They have grovelled in the dirt, and the famous "Bankers' Tardies" leaflet is a most shameful example. The longer they are in power, the more plainly are their true natures revealed.

Alberta people should feel thankful there is a constitution safeguarding them against ill-advised and hastily conceived legislation. Supreme court action as unwise, those who would like to see the rights of oil and gas to suit their selfish ends do not like and try and make believe are opposed to the will of "THE PEE-FUL." There is more need for an accurate information bureau within the government's own ranks than one designed

to muzzle the press. The press has told the truth, much more so than Premier Aberhart has done. Apparently he has no intention to go to his constituents in Okotoks-High River and face the music.

Ratepayers of the town and school district are reminded that October 31 marks the closing date of registration for voters qualified to vote in the civic elections in February. If you are in doubt as to your name being on the voters' list, go to the town office with out delay and make sure. Every election day people complain that their names have been left off the list. The Act plainly states that certain classes of people qualified to vote must register EVERY YEAR.

The provincial government information bureau is wasting time and money sending to weekly newspapers copies of addresses of members in the legislature. The latest by Mrs. Gostick is a "jipper." She says: "The banks create money out of nothing and lend it to the nation." Why not the provincial government organize its own bank, as suggested by W. N. Chant, former minister of agriculture in the Social Credit government, if it is as easy as that to create money? The more some of the S. C. members talk, the more they expose to the public gaze their crass stupidity and ignorance.

Oh! Oh!

It is claimed that at least ninety per cent of the great men of history have had prominent noses. But there is no evidence to show that they put them into other people's business—Blairmore Enterprise.

The Nanton News remarks: Premier Aberhart could improve the "accuracy of news and information" by being more accurate in the statements in his public addresses, which are broadcast over the radio or given to the public through the press.

IF PROPAGANDA IS NOT FIT TO PRINT?

Parts of Literature From Social Credit Bureau of Public Relations Offensive.

(High River Times)

The Times last week received the preliminary grist from the government's "Board of Public Relations." The action of the Lieutenant-Governor in withholding assent to the Press bill, has postponed at least any compilation on the part of newspapers to use any such material.

Even if it had been compulsory to use it, the Times would have refused to print it in full, and would have taken any consequences resulting therefrom. One of the reasons for refusal would have been the fact that a portion of the propaganda was unfit for print. Terms were used which are not tolerated in a civilized society. If had printed the extracts referred to it would have been an affront to the denunciations. Our subscribers, regardless of political views, would have been revolted, and it would have been surprising if some subscribers would not have expressed their disgust by cancelling subscriptions—Social Creditors less than others.

Quite aside from the free advertising demanded by the government, the newspapers have certain standards which have been set up by members of the press themselves, and by the public whom they serve. These standards forbid the use of any such expression as was included in the first output of government propaganda.

The argument against provincial government control of the Press can be transferred from the basis of freedom to the basis of offensive literature.

Anyone wishing further enlightenment on this phase of government activities, may step into the Times' office, and see for himself—provided he is twenty-one years of age and able to take it.

The Gazette has received its first instalment from the Bureau of Public Relations at Edmonton, and

judging from the first instalment, the work of the bureau will be of distinctly propagandistic nature.

In fact, some of it is indecent. This is the brand

of publicity that the government intended to control the newspapers to publish—MacLeod Gazette.

JOURNAL OFFICE

Caretakers Engaged
By School Board

At a special meeting Thursday evening Frank Paterson and Wm. Autenroos were appointed to Central and high schools; Tom Brennan to West Coleman; Dave Sudworth and Jules Ancelot were engaged as assistants on three months ten to alternate during the school term. The summer caretaker will be Schools' Board.

In the summer the board will decide the hours. \$100 a month is paid each caretaker. 34 applications were received in response to the ad. in last week's Journal.

Mr. and Mrs. West Vincent of Nordegg, Alta., left Wednesday after visiting relatives and friends here for the past few days. While here they were the guests of Mr. and Mrs. Fred Bedington.

Local News

Mrs. J. J. McIntyre and daughter Winnifred were week-end visitors at Lethbridge.

Jimmy Jempson, of Calgary, arrived in town Tuesday and will make preparations for joining the local hockey team.

Mr. and Mrs. West Vincent of Nordegg, Alta., left Wednesday after visiting relatives and friends here for the past few days. While here they were the guests of Mr. and Mrs. Fred Bedington.

Salvation Army

Adjutant Finney, of Fernie, will conduct the week-end services in the Salvation Army hall as follows:—Friday, 7:30 p.m. meeting for young and old. Saturday, 10:30 a.m. Directory class. 3 p.m. company meeting, (Sunday school). 7:30 p.m. great salvation service. Everybody welcome. Come and here Adj. Finney.

A quiet wedding was solemnized at St. Mary's cathedral, Calgary, when Irene, only daughter of Mr. and Mrs. M. Lieskovsky, of Blairmore, became the bride of Mr. Joseph Michalsky, eldest son of Mr. and Mrs. Joe Michalsky, of Coleman. Mr. and Mrs. Michalsky will reside in Coleman.

Heater Time is Here

We are showing this year a line of
McClary Furnacettes
in different models.

Also a few old style Round Heaters, brick-lined. Come in and see them.

LATEST IN McClary RANGES.

We have a full line of coal pants and stove pipes now on hand.

Also a few SECOND HAND HEATERS at a low price.

ALBERTA

The Facts About Banking in Canada

Reproduced from the Sixth Broadcast in a Series by Vernon Knowles for the Chartered Banks of Canada and Delivered Over a Province-Wide Network of Alberta Stations on Tuesday Evening, October 12th, from 8:30 to 8:45, and Wednesday, October 13th, from 12:00 noon to 12:15.

Outlines Loan Process by Which Banks Convert Credit of Borrower into Spendable Money . . . Shows Position of Bank Shareholders . . . Deals Further with Limited Power of Banks To Issue Own Notes . . . Cites from Letters Received Actual Cases Where Bank Loans Enabled Borrowers To Turn Substantial Profit.

In this broadcast on behalf of Canada's Chartered Banks I want to get back to that utterly mistaken idea that banks make money out of nothing. Critics of the banks will tell you that banks lend by creating credit and that they create the means of payment out of nothing, that when they build a building it costs them nothing and that when they pay taxes it costs them nothing. These statements are absolutely untrue.

When a bank makes a loan just exactly what is it that the bank does?

Here is the answer — It takes the note of the farmer or manufacturer or the bond of the Government, and places an equivalent amount to the credit of the said farmer, manufacturer or Government, allowing of course for a rental on the money.

In other words the bank assumes an obligation to pay that amount to the farmer, the manufacturer or the Government.

Since that obligation is one that must be met — and in actual practice is met — it is a very real thing.

The transaction creates a credit on the books of the bank but the *means of payment* which the banks are charged with creating out of nothing consists of resources of the bank — in the last analysis, cash.

Moreover, it should be borne in mind that in all lending transactions by a bank it is the borrower who starts the process — he goes to the bank and asks for a loan, generally for a specific purpose, out of which he expects and intends to make a profit for himself over and above the bank charges. The bank does not go to him — he goes to the bank.

What the bank really does, in effect, is to convert the credit of the borrower himself into spendable money, which he can use for the purposes of his business, paying wages, paying his debts at the country store and meeting other obligations. If a man owns cattle he cannot spend cattle. He cannot pay his debts at the country store with cattle. His ownership of the cattle and his expectation of selling them at a profit to himself are the basis of his credit. When he borrows from a bank on the security of cattle what happens is that the bank converts a form of wealth, which he cannot spend, into something which he can spend and which anybody else will accept.

There is no magic about it and those who contend that a bank can create money or the means of payment out of nothing, are entirely wrong. The function that the bank performs, as we have stated, is to convert the credit of the borrower into a form in which he can spend it.

Without a bank the farmer possibly could buy seed in the spring, hire help through the growing season and harvesting, and purchase supplies for his family in the meantime on credit — paying these debts from the sale of his crop in the fall. However, common sense tells us that the seed merchant, the farm labourer or the country store keeper could not get very far on this basis, for they could not pass on the people, from whom they in turn buy goods or services, the obligations which they have received from the farmer.

Why is this so?

For the reason that, be the farmer's credit ever so good, how could scores of people look into his integrity and his financial worth, as they would require to do before taking his promise-to-pay. Instead, the bank looks into the farmer's affairs, accepts the risk, lends him the money and enables him to pay cash.

If it were otherwise and if banks created the means of payment out of nothing, why has it been necessary through the centuries to find people, called shareholders, ready to put their money into the banking business in exchange for a fair return? If no basis is required for what the

bank does, the business of banking should be an amazingly profitable business — but it is not. The fact is, it is not an amazingly profitable business is a simple matter of record, as we have shown in our broadcasts.

Some of our listeners have asked that I say more about note circulation — that is, about the powers of a bank to issue notes. The request has been prompted by the utterly fantastic idea that a bank can, say, erect an expensive branch office building for nothing by issuing its own notes. A bank simply cannot, as has been suggested, issue a bunch of specially numbered bills, pay them out to contractors and others and then cancel them when they come back.

Let me say to you again that no such thing could possibly happen, for the bank must give the holder face value for its notes when he presents them. Moreover, I have shown you that there are very definite legal limits upon the amount of notes that a bank can issue. A bank's notes are a debt owed by the bank to the person who holds them — a debt redeemable in cash on demand.

As a matter of fact, a bank's notes are the very first charge upon its assets — that is to say in case of trouble a bank's notes have to be paid off before a single cent can be paid on any deposits or on any other debts owed by a bank. To make doubly sure of this there is a fund in the hands of the Dominion Minister of Finance, known as "The Bank Circulation Redemption Fund."

This is money paid in by each of the banks to the Minister of Finance at Ottawa, amounting to five per cent on the average amount of Chartered Bank notes outstanding. This money is in the nature of a pool and would all be used, in case of need, towards paying off the notes of any bank. Surely all of this should finally quell the idea that a bank has unlimited power in the matter of issuing its bills.

In any case, as I have told you before, the right of issuing notes is being steadily, year by year, taken away from the Chartered Banks and vested in the Bank of Canada. In order to obtain Bank of Canada notes or bills for use as currency the Chartered Banks have to buy them. Every dollar in notes and every dollar of other bank obligations must always have behind it a dollar of assets. Let me stress, once more, that every obligation of a Chartered Bank is payable in cash.

Some supposedly great authority is quoted as having said that if all bank loans were paid all deposits would disappear and there would be no money in existence. I don't think that many Alberta people are stampeded by such statements.

It is equivalent to saying that if every sea were drained dry there would be no ocean liners. If every bank went out of existence tomorrow there would still be wealth but the job of marketing that wealth would take us back to the dim, distant days of barter. Nothing is gained at any time by such extreme statements.

You have been told that when a bank makes a loan and takes security, the bank then uses that security as if it were its own. Such a statement is 100 per cent false. The security lodged with the bank remains the property of the borrower and all the records of the bank prove that fact. He can call for his security to be produced and shown to him at any time. Such security does not appear in the bank's balance sheets at all and when the loan is repaid the security is handed back to the borrower intact.

Some of our critics plunge into very deep water when they draw conclusions from the statement that every dollar that comes into circulation represents a debt on which somebody must pay interest. That statement is used to convey to you a

sinister impression, an entirely false idea of what money really is and does.

To illustrate in the plainest of everyday terms let us start from the beginning:

I go into the bank and I borrow \$1,000 on which, naturally, I have to pay rent, or if you prefer, interest.

The bank gives me, in exchange for my note, \$1,000 in bills. I have got \$1,000 of money, on which interest has to be paid because the bank is giving me a service.

Why do I borrow the money?

I was going to use it in a deal, expecting to make a profit for myself; or I wouldn't have borrowed the money at all.

Very well; I carry out the deal successfully, I repay the bank the \$1,000 I borrowed, and I have a profit, say, of \$100, which I put to my credit.

You will see by the use of this borrowed money on which I paid rent, I have increased my own resources by \$100, and the bank has received back its \$1,000.

When you multiply that thousand-dollar borrowing of mine, my use of the money and my profit, time after time, you see what is happening continuously throughout the year in the business world and you see that the interest is not any strangling charge as has been represented to you. You pay rent, and you make a profit out of it — whatever the nature of your business may be.

It is a continuous, revolving process — in which the dollar you use is not dead-weight debt at all, but productive money. There are times, however, when some of it may become temporarily dead-weight debt. To illustrate such a case, let us say that through drought or misfortune I suffer a loss for a season — say my deal has not been successful and I lose a part of my borrowed \$1,000.

In these cases, what I have lost does for the time being become dead-weight debt. But with a better season and better prices and better business I have a chance to recover my losses and repay. By far the greater part of the dollars that are issued are not dead-weight debt, as you have been so often told; there is nothing sinister in the manner in which the purpose of their issue, nor in the work that they do; they are, in fact, productive money, constantly adding to goods and services and increasing the world's store of new wealth.

That is all there is to bank money. Bank loans are really constructive and productive; and the deep, dark hocus pocus with which critics seek to surround it is recognized, by folks of practical experience, as simply practical nonsense.

Since we started broadcasting on behalf of Canada's Chartered Banks I have received many letters from Alberta people: I have before me one of them, which gives an instance of a large-scale farmer who had occasion to borrow \$5,000 to purchase feeder cattle.

This farmer says: "When I borrow money I estimate my prospective profit very carefully and, if I do not see where I am going to make interest charges and a substantially higher profit for myself I do not borrow the money. Without a bank loan I could not possibly have financed the purchase of the cattle and, further, I feel that the bank's profit is small and minor proportionately large. I consider that I should assume all the risk of loss for the sake of this higher prospective profit. My borrowing is intelligent borrowing from a purely individual and selfish standpoint. I had a similar loan, on which the interest charges amounted to about \$100 some time ago. On this loan I realized a net profit of more than \$2,000 because I was able to feed all of my coarse grain and to realize in the neighbourhood of ninety cents a bushel when prices were in the neighbourhood of twenty to thirty cents a bushel."

I have another Alberta letter, in which a farmer tells us that he had twenty hogs, being short of feed, wanted to sell them. He was offered \$200 for the twenty hogs and did not want to let them go at that price, so he went to the bank and borrowed \$50 only. This enabled him to feed the hogs and feed them a while longer, with the result that he eventually sold them for \$300 instead of the \$200 he had been offered. In other words he borrowed \$50 from the bank, the bank made a gross revenue of about \$1.75 but the farmer made a straight profit of \$50.

I have a letter before me also which appeared in the Calgary Herald from a Milk Producers' Association in the vicinity of Calgary. It reads in part: "We are hearing a good deal about banks these days. I do not profess to know much about banks or the banking business but I do know that, if it had not been for the banks last fall, I, along with many others, would have been forced out of business." These are but a few examples taken at random from a large quantity of our mail.

In earlier broadcasts I have told you that deposits in the banks are the basis upon which banks can make loans. Let us demonstrate its truth.

Suppose a bank started business with \$50,000 in cash and lent that amount to various borrowers. Then suppose each borrower drew out the amount lent to him, in cash, and each person to whom he paid this money put it in a sock, kept it under his mattress or hid it behind the clock, so that none of it came back to the bank in the form of deposits. As the bank has no cash in its vault the bank dare not make another loan because it could give no cash to the new borrower.

We can go on converting borrowers' assets into spendable form, i.e., making loans, only if the depositing public are willing to entrust their funds to us. It is the confidence of the people in banks and their willingness to leave their money on deposit that enables a bank to lend money and serve the community.

How, therefore, can it be said that we have usurped the right to monetize credit? As we have shown, it is the individual who in the first place possesses the credit; he asks the bank to convert that credit into money he can spend. The bank only does it on his request.

Now I have an announcement to make. This is the last of our broadcasts, at least for the time being. In one of our broadcasts we said that some of your Alberta branch bank Managers might be heard in this series. Instead, I incorporated in my talks with you, much material which came to me direct from them.

We told you in starting out talks that we would be non-political and non-controversial and would state to you nothing but the unvarnished facts about Canada's Chartered Banks and the work they do. This is exactly what we have done. There is no mystery about Canadian banking, other than the mystery created by critics who are not well informed.

We are doing an honest business and have nothing whatever to fear from the fullest disclosure. Four million depositors have confidence in Canada's Chartered Banks. Were it not for that confidence in the honour and integrity of Canada's Chartered Banks, no loans could be made at all.

We wish to thank our listening audience for the many encouraging letters and messages they have sent in. Our talks have all been put into pamphlet form, and if you wish to have them, any branch bank Manager will be glad to give them to you and to talk over with you any of the matters with which we have dealt.

Theorists never run out of theories — but facts are stubborn things. Our story stands for your fair-minded consideration. We leave it to you with confidence.

Aberhart is probably learning by paper to publish anything against provinces but Alberta — and that's because of the Aberhart government. Neither have they been anxious to deal with Germany. — Blairstown Enterprise.

Large eastern manufacturing concerns are advertising to the effect that they have recognized agencies in all

provinces but Alberta — and that's because of the Aberhart government. Neither have they been anxious to deal with Germany. — Blairstown Enterprise.

"There's music in the air." The musical festival at Blairstown opens on Monday, November 1, for three days. Posters have been printed and programs will be ready this week.

Comforting Sound
She: "In time of trial, what do you suppose brings most comfort to a man?" He: "A verdict of 'Not Guilty', I should imagine."

WORLD HAPPENINGS BRIEFLY TOLD

Lieut. William Ronald Harley of the Royal Air Force was killed when his plane crashed into Moray Firth during naval manoeuvres of the northeastern Scottish coast.

Jerry Ambler, Calgary cowboy, won the bronc saddle riding contest on "Tea Traler" at the 12th annual world championship rodeo at Madison Square Garden, New York.

Soviet Russia announced its first direct secret election of a national legislative body will be held Dec. 12 when a new supreme Soviet will be named.

Commander S. A. D. Grey, London, 48, wartime flyer called "Daredevil Grey," fell to his death from a ninth floor window when fixing a radio aerial.

General Erhard Milch, secretary of state in the German air ministry, declared France's military aviation ranks among the finest in the world, after witnessing French aerial units in action at Rheims.

It is understood one battalion will be added to each of the three regiments of the territorial army in Northern Ireland — the Inniskilling Fusiliers, the Irish Fusiliers and the Ulster Rifles.

Canada will have a pavilion at the 1938 Scottish Empire Exhibition at Glasgow with a ground floor area of 24,000 square feet, Mayor James G. Farrelly, deputy minister of trade and commerce, said after returning from Europe.

Ronald MacDonald, back in London after a long holiday in Scotland, recently observed his 1st birthday. Physicians have consulted the former prime minister against resuming work too early after his long period of poor health.

The Greatest Danger

Good Straight Road Seems To Be Temptation To Drivers

When you examine 700 highway accidents and find that 255 of them occurred on straight-away stretches and only 125 at admittedly dangerous curves, you do not have to go far to find the only possible explanation, which is excessive speed. Barreling a few plain lunatics, the very great majority of drivers take such hazards as bad curves, hill crests, etc., with a certain degree of caution. But the wide-open modern road, properly surfaced, marked and banked, is too much of a temptation for a multitude of people who are in too much of a hurry even to think. That is why the majority of accidents happen where there is least excuse for them — Montreal Star.

Berries Grown On Desert
Tons of raspberries and other fruit have been grown in Kara Kum, the black desert east of the Caspian Sea in Russia. This has been reported to Moscow by Soviet scientists who were in charge of the cultivation of the products in soil previously believed to be barren.

Although coyotes choose special places to met and yelp their weird songs, they never use the same meeting place twice in succession.

There are 6,657 miles of railways within the borders of the state of Oklahoma.

Medical Smoke Test

Soft Coal Smoke In Cities Said To Be Weight Reducer

The soft coal smoke of cities is a weight reducer, an ally of pneumonitis and bronchitis and a cause of fibrosis in the lungs.

This medical report was published in the American Journal of Public Health in connection with the 66th annual meeting of the American Public Health Association.

The medical smoke test, for the first time, separated the effects of the three common fumes, bituminous, anthracite and coke. Little harm was found in anthracite and coke.

The study was made on rats, mice and rabbits at the Schnurer, M.D., of the Allegheny General Hospital.

The animals lived in chamber containing smoke in the same proportions breathed by humans, but the concentration was higher and more constant. Compared with other animals living in smoke free chambers, the rats in the anthracite air gained five per cent. more weight. In coke air the rats gained 14 per cent. In bituminous smoke their weight was 25 per cent. less than the control animals.

This however, did not mean that coke and anthracite are sure to cause more weight. For rabbits slowed their weight increase in all three kinds of smoky air. For the worst for them was soft coal, which went down by 61 per cent.

The largest number of uncomplicated pneumonitis and of cases of bronchitis appeared in the animals in soft coal smoke.

Wealthy Man's Benefactions

Lord Nuffield Gives Large Sum To Worthy Causes In England

Lord Nuffield has announced a second gift of \$300,000 (\$14,000) to the Radcliffe infirmary at Oxford.

Lord Nuffield previously had given \$150,000 to the hospital. The second donation is in the form of an endowment fund, the income from which is designed to raise the standard of the infirmary's services.

Recently it was announced the motor car manufacturer had donated £50,000 to the rebuilding fund of the hospital for sick children in London and £15,000 to the Princess Elizabeth orthopaedic hospital, Exeter. The philanthropist's benefactions in the last 11 years total some £8,000,000, including a gift of £2,000,000 to Oxford University for endowment of a post-graduate school of medical research and £2,000,000 for relief of the distressed areas.

Retriever Was Smart

The other day a true retriever gave a remarkable display of the bloodhound's special gift. A lady lost a much-valued comb in a hay field. A retriever which she did not know was summoned to the search. He was made to smell the lady's hand first and then told to seek. After half an hour's diligent search he came to hand with the missing article!

Returning To Oxford

The Hon. Alastair Buchan, who has been visiting his parents, Their Excellencies the Governor-General and the Lady Tweedsmuir, for the past few months, sailed in the Duchess of York from Montreal for England. Mr. Buchan will return to Oxford University to resume his studies.

Britain Loves Peace Statesmen Doing Everything They Can To Avert War

It has been impressed upon us several times by authorities that Great Britain today is a morally different empire than the one which entered the World War. Britain, today, is determined to keep peace at practically any cost, even at the cost of giving the strongest family of nations, which she did during the Italian invasion of Ethiopia. The British has the very word of "war" and mean to use every diplomatic trick to avert a conflict. Britain always did like peace, but she never allowed another power to bluff its way into a position threatening the supremacy of England on the seas. But the Great War changed things. London is now quite sure that the rest of the empire will not follow the home country into any war which might come along, and the people have given notice that it would have to be a pretty serious affair before they descend to fight on foreign soil. A great navy is being built, yes, but Britain must remain supreme in the seas if the empire is to be kept intact. The navy is England's life line. The main fact is Britain's fighting courage and determination to find peaceful solutions to world problems rather than turning to war-like measures at any provocation. To-day Great Britain is faced with double trouble — in the Mediterranean and in the Far East. In the inland sea, she is making a solid stand for safe neutral shipping, and has succeeded in making rather peaceful negotiations with Italy, the power threatening British supremacy. In the Orient, she has been forced to take a veritable slap in the face from Japan, whose aviators shot the British ambassador. Tokyo merely said, "Sorry," and the British Parliament accepted it. Great Britain has been tried almost to the limit of endurance, but has kept her head well. It is said by some that her empire is decaying, and it perhaps is true that the imperial line is not as strong as once it was. Yet British statesmen deserve praise for continually seeking the peaceful path in a forest of armaments and bayonets. Eternal peace may be an impossible Utopia, but the efforts of Great Britain, leading with the United States, may yet produce a better end to the chaotic mess in which the world finds itself to-day. — San Francisco Argonaut,

A frock you'll really "live in," this bound-to-be-admired "stylist" from it's pattern so easy to make, that you won't rest until you've at least two different versions in your wardrobe. Business or "bonfire" will be delighted with the versatility of Pattern 4524, for whether you wear it with dashing contrasted color-striped "T" cuffs and belt or a jaunty set of stripes, like this Anne Adams model is in perfect taste at all times! Wouldn't you like your version in wool or silk?

Pattern 4524 is available in misses' and women's sizes 14, 16, 18, 20, 22, 34, 36, 38, 40, 42 and 44. Size 16 is 36" bust, 30" waist, 42" hips. Fabric and 1 yard 39" inch contrasting fabric. Illustrated step-by-step sewing instructions included.

Be Careful About Children's Colds

TREAT THEM
PROVED WAY

More mothers use Vicks VapoRub than any other medication of its kind—those who have proved it by use in their own homes. It is the only cold remedy that has been proved in the world's largest colds—children's colds. It relieves aches and pains, and cures colds. It is a safe, non-irritating, non-stimulating, help break local congestion. It is the only cold remedy that is, by morning, the world over.

RICHARD CONNELL

By Arrangement With Thomas Allen, Publisher, Toronto/

CHAPTER I.

"Pop, 10,001," remarked the last census, speaking of Bear Falls, which nestles, surrounded by tall corn and grain, in the drift of a great river.

Ten thousand of those who lived, moved and had their being there, were the usual More-or-Lessers. They were more or less prosperous, more or less virtuous. They possessed more or less intelligence, beauty and charm and were more or less happy, more or less sad. They had the standard quota of health and hope, the usual stock of assorted dreams and desires. So much for the ten thousand. The odd one was Ernest Bingley.

If, by design or mistake, you chanced to be in Bear Falls, you might not have been able to tell its Main street from the chief thoroughfare of Bellows Falls, Vermont, or Klamath Falls, Oregon. It was lined with the familiar facades, peopled with the familiar faces. One shop alone was unique. It was a small neat establishment, with a single glass bow-window. It was sandwiched between the Bijou Dream Movie Theatre (Bank Nite Thursday), and the opulent Elite Bootery conducted by Mr. Caleb Slocum. It flaunted no garish signs, but bore a small brass plate with the legend

IVANHOE PET SHOP AND TAXIDERMY

Ernest Bingley, Sole Prop.

On a fair and tingling fall day the sole prop. was practicing his art in the room at the rear of his premises which he called his studio. A blue chest of drawers and a desk, in one corner suggested that it was also a writing quarter. The curious mid-west sun peering through the wide north-light windows beheld a scene which was a blend of jungle, zoo, and rummage sale. Rows of birds, ranging in size from canaries to geese, stared down from shelves with impassive eyes. In one corner a bear-cub was essaying to climb a paper-mache tree. He would never make it, poor cub, but was destined to remain, forever, Tantalus-like, half way to his goal, until the mother got him. In another corner, a placid pig dog reclined serenely on a wooden pillow, unperturbed by the fact that a family of wildcats, father, mother and daughter, crouched not a foot from his nostrils. On stretchers were the hides of various animals. A boldfaced moose leered amiably from the wall. About the place were strewed odd bits and pieces of creatures feathered, furred and pictorial, the head of a hawk, the skeleton of a sunfish, the skin and bones of a lamb which would gambo no more in some green Iowa pasture.

With a piece of chamois Ernest Bingley deftly polished a surprisingly life-like glass eye and backed off to survey, critically, his masterpiece to date.

It was a horse, a tall, able-bodied, handsome horse, so cunningly mounted that he seemed to be charging, full gallop, at some invisible barrier. Ernest gave a little sigh of satisfaction. No connoisseur of stuffed horses could, he felt, cavil at his handiwork.

He patted the horse's muscular neck.

"Easy, boy, 'easy,'" he said.

Moved by some sudden fancy, he began, inexperiently, to clamber up on the broad back of the stationary steed. But just as he settled into the phantom saddle and gathered up the imaginary reins, a second notion

IN UP-TO-DATE STABLES

—Old Reliable Minard's

What horses come in to stable with wire-cuts or saddle sores, or now have caked under the thing to do with the Minard's? Let me tell you, Doctor, of Glendale, Memphis, know. He writes him.

"I like your Minard's! Like to keep it in a stable. I have found your Minard's stable, and it's good for berber wire cuts on horses."

A family doctor prepared Minard's Liniment over 40 years ago. Still invaluable in every stable and every home.

struck him, and he dismounted. He shook off a stained and rumpled smock and donned, as more appropriate, a well-worn henna-hued tweed coat. His eye lighted on a bamboo fish-plate dusty from disuse. This he seized and again he mounted the horse.

Grasping the pole in his right hand he pointed it straight ahead, like a lance, rowed the flanks of his charger with unseen spurs, and cried, ringing, defiant tones,

"What ho, varlet! Have at you, Sir Brian duBois Gilbert! You'll rue the day you dared cross lances with a Bingley!"

His shouting was interrupted by a sound behind him. He whipped his eyes around and saw, in the doorway, a brief, paunchy man, goggling at him, pop-eyed.

"Oh, hello, Mr. Slocum," said Ernest, and the pink of his neck did not come from the sunset.

"Snakes alive, Ernie, what's got into you now?" demanded Mr. Slocum.

"Well, you see," explained Ernest, "he looks so life-like, I sort of thought I'd take a ride—"

Mr. Slocum wagged a disapproving toupe.

"Do you want folks to think you got hot-owls in your attic?" he inquired.

"No," said Ernest. "I don't" "Well, I, myself, saw you fishing and boating on a dead horse they might think you didn't have all your wits," stated Mr. Slocum.

"I guess some people think that already," said Ernest Bingley.

"So they do, Ernie, so they do," returned Mr. Slocum cheerfully.

"Well, I can't stay away from my store very long. Got your camera ready?"

"Yes. There it is on the work bench, under that porcupine."

"How do you want me to take you?" queried Mr. Slocum, as he gingerly untangled the camera from the porcupine.

"Just like this," said Ernest, from the horse.

"Pole and all?"

"No." The pole clattered to the floor. Ernest sat erect, his arms folded across his chest, and a stern, equestrian look in his hazel eyes.

"Shoot," said Ernest.

"Well," observed Mr. Slocum, as he faced the camera and squinted along its sights, "I'm only doing this to help out a neighbor, but if I was a young businessman, trying to win trade, I wouldn't go round having my picture taken on stuffed horses. In business you always got to ask: What will the *customers* think?"

"Mine will think it is a real horse," said Ernest, and added, "I hope."

"Click!" went the camera shutter.

"Of course," went on Ernest, "I'll tell her the truth. When they see that natural job I made out of Tarzan maybe I'll get more orders. I need 'em."

"I can't deny," said Mr. Slocum, "that Tarzan looks real enough to eat oats; but I doubt if you'll ever get rich stuffing horses in this part of Iowa. They'll never be a popular number around here. Too unhandy."

"I shall be glad to entertain it," he said.

"My boy, Luther," said Mr. Slocum, "has no head for shoes."

"Beig pardon?"

"My Fred has, my Roy has, my Len has," said Mr. Slocum, "but not Luther. He just hasn't got the gift."

Why, say, only yesterday he let a customer get out of the store with a pair of three-fifty ties on, when he should have sold her at least a two-pair of six dollar shoes, and some hoseery. "That," said Mr. Slocum, "convinced me that Luther is not a natural fit for the business."

"I'll do, Ernest," said Mr. Slocum, "to set him up in some business where he don't count against you if you don't count around some. Tell you what I'll do, Ernest. I'll give you five thousand, sand, spot cash, for this shabang, its stock, fixtures and good will. Is it a deal?"

"It is not," said Ernest, firmly.

"With five thousand you could go round the world till you were dizzy," argued Mr. Slocum. "You'd have to stuff half the horses in the state of Iowa to make that much. It is a deal?"

"No," said Ernest. "Thank you just the same."

"You need not expect me to tilt the ante," said Mr. Slocum. "Five thousand is my offer. Take it or leave it."

JOYS and GLOOMS

BUT, SALLY...
I DON'T
UNDERSTAND
WHAT
HAVE I
DONE?

OH, I DON'T KNOW AND I DON'T CARE! MY HEAD ACHES... AND I DON'T FEEL RIGHT... PLEASE LEAVE ME ALONE!

30 DAYS LATER...
SHE'S BEEN A
CHANGED WOMAN.
SHE'S GOT RID OF HER
HEADACHES
AND SLEEPLESSNESS.

...SWITCHING TO
POSTUM
DIDN'T
DO IT!

"Just about always," he replied. "Don't be a loon, Ernie," said Mr. Slocum. "It would be throwing money away. Take my advice and save up and get yourself a car, a bungalow, a radio and a wife, and settle down. You got the makings of a nice little business here. If you did less mooning around and got out and mixed with folks more you could build it up to something mighty sweet. How mopping off to the ends of the earth would help trade I don't see."

"Oh, it's just a wish," said Ernest. "Probably I'll never be able to afford to go abroad, or any place. Thanks for taking my picture, Mr. Slocum."

"Ernie," said Mr. Slocum, "I got a proposition to make to you."

Ernest slid down from the horse and endeavoured to look shrewd and businesslike.

"I shall be glad to entertain it," he said.

"My boy, Luther," said Mr. Slocum, "has no head for shoes."

"Beig pardon?"

"My Fred has, my Roy has, my Len has," said Mr. Slocum, "but not Luther. He just hasn't got the gift."

Why, say, only yesterday he let a customer get out of the store with a pair of three-fifty ties on, when he should have sold her at least a two-pair of six dollar shoes, and some hoseery. "That," said Mr. Slocum, "convinced me that Luther is not a natural fit for the business."

"I'll do, Ernest," said Mr. Slocum, "to set him up in some business where he don't count against you if you don't count around some. Tell you what I'll do, Ernest. I'll give you five thousand, sand, spot cash, for this shabang, its stock, fixtures and good will. Is it a deal?"

"It is not," said Ernest, firmly.

"With five thousand you could go round the world till you were dizzy," argued Mr. Slocum. "You'd have to stuff half the horses in the state of Iowa to make that much. It is a deal?"

"No," said Ernest. "Thank you just the same."

"You need not expect me to tilt the ante," said Mr. Slocum. "Five thousand is my offer. Take it or leave it."

If you are one of those who cannot safely drink tea or coffee... try Postum for the full 30 days.

If, after 30 days... *you do not feel better*, return the top of the Postum container to General Foods, Ltd., Cobourg, Ont., and we will cheerfully refund the full purchase price, plus postage!

Give Postum a *fair trial*... drink it for the full 30 days!

Postum contains no caffeine. It is simply whole wheat and bran, roasted and slightly sweetened. Postum comes in two forms...

...Postum Cereal, the kind you boil or porridge... and instant Postum, made instantly in the cup. It is economical, easy to make and delicious. You may miss tea and coffee at first, but after 30 days, you'll love Postum for its own, rich, full-bodied flavor.

Something New In Pictures

Double Sound Track Is Used In Talking Film

A new talking movie film in which the actor's voice moves around the screen with his figure was demonstrated to the Society of Motion Picture Engineers in New York.

If the screen figure spoke from the left of the picture, his voice came from the left side of the house. The answer of a figure on the opposite side of the screen came from the right side of the house. If the actor moved back from the front of the picture his voice receded with his figure.

The new film uses a double sound track for the first time to produce the "stereophonic" sound, and was announced as a triumph of the special aims of the mind. These life-like sound effects have been produced in laboratories for several years. Expenses have kept them from being adopted by movies.

Given Royal Titles

Name Of Indian Family Too Difficult To Pronounce

"The Prince of Wales" was demonstrating at Fort Townsend, Washington, after a week's illness in the hospital.

"The Prince of Wales" was born 76 years ago on the site of what is Fort Townsend's busiest corner and is the last of the hereditary chiefs of the fast-dwindling tribe of Chal-

lams. Early settlers gave him his princely title because they found his tribe, the Laramies, too difficult to pronounce. Similarly they christened his father "The Duke of York," his mother "Queen Victoria" and his uncle "King George."

Will Hold Its Own

A prediction that the transoceanic aeroplane would never take the place of the steamer came from Frederick W. Whitehead, British aeroplane motor manufacturer, and designer of the trans-Atlantic flying boats Cambria and Caldonia. Whitehead said plane travel would always be expensive—"beyond the reach of the ordinary traveller."

THE MIKADO (REVISED VERSION)

My object all sublime
Has changed in course of time;
The punishment now precedes the crime;
It now precedes the crime.

—Glasgow Record.

Museum At Louisburg

Seaport Town Once Held The Key To North America

Events in the 18th century struggle between England and France for possessions in America were recalled at Louisburg when Lord Tweedsmuir dedicated the Federal museum at this Nova Scotia seaport town, which once held the key to North America.

His Excellency stood over the ruins of what was once called the "Dunkirk of America," the strongest French fortification on this side of the Atlantic before it finally fell into English hands in 1758, and formally declared open the museum which houses relics of the famous siege.

Hundreds braved the wind-driven rain to hear the speech. It was a speech that should make every patriot proud to have been born in this country. This thought should check every worldly feeling and unworthy purpose and embolden us in an atmosphere of heavenly peace. They have overcome, have risen, and are glorified, but they remain our comforters in every hour of darkness. They also grieved, doubted, and struggled, but in their victory we see the certainty of our own.

Little Helps For This Week

Wherefore seeing we also are compassed about with so great a cloud of witnesses let us lay aside every weight and the sin that doth so easily beset us, and let us run with patience the race that is set before us. Hebrews 12:1.

Could we lift the veil between, Could we for a moment witness those unnumbered hosts that stand Calm and bright on either hand; What a joyful hope would cheer, What a fair sphere would guide us.

Great may be the danger near, Greater are the friends beside us.

We are compassed about with a cloud of witnesses whose hearts throb in sympathy with every effort and struggle, and who thrill with joy at every success. This thought should check every worldly feeling and unworthy purpose and embolden us in an atmosphere of heavenly peace. They have overcome, have risen, and are glorified, but they remain our comforters in every hour of darkness. They also grieved, doubted, and struggled, but in their victory we see the certainty of our own.

Listed Under Mishaps

Reporter Had Difficulty Finding Data On Bomb Explosion

Recently Neal O'Hara in the New York Post, a reporter on a New York morning daily tried to dig up clippings in the paper's reference library on the Wall Street bomb explosion of 15 years ago in which 36 persons were killed. But looking through the filing system "Explosions" "Disasters" "Bombings" and "Wall Street" he couldn't find a thing. The envelope of clippings finally turned up under the heading of "Mahala."

A Real Racket

Mahatma Gandhi Has Clever Way To Collect Money

When Gandhi is leaving a town, the date is announced beforehand, crowds throng the station to receive his blessing. A few minutes before the train due to leave Gandhi appears at the window of his third-class compartment, gives his blessing, tells them: all contributions will be gratefully received. Immediately there is a shower of notes, coins, of every denomination. At every station on the journey, however small, the train stops, the same happens. Cavalcade.

The California palm saves its old leaves from year to year and drops them over its trunk as a protective covering.

Just ask yourself as you step on the gas whether it is a matter of life and death whether you pass that other car in front.

IF I COULD ONLY GET AN UNBROKEN NIGHT'S REST!

Up time and again because of kidney and bladder weakness! Need something with a tonic and restorative power like Gin Pills. Take one or two pills up the Gas Pipe before you go to bed. They'll help you sleep through the night.

WEEKLY SPORTS REVIEW

GOOD TEAM NOW ASSURED FOR HOCKEY SEASON

Now that Coleman has imported a few good hockey players together with the several good players from last year's club, and a good club is practically assured, will it not be record that the convention of the fact it is suggested that an electric clock be installed in the arena so that all can see the time goals are scored and how long the game will progress or have progressed.

The clock installed at Lethbridge was bought solely through business men and companies of the city buying advertising space in the arena paying for electricity connected by the clock. Could not Coleman do the same thing and give fans the extra thrill of wondering if their team can hang on to the lead goal and when the clock slowly ticks off the minutes until the final whistle? Why not install a loud speaking system so that fans may be given the name of the player and the player or players assisting in the goal?

REGISTERING JUVENILE PLAYERS

Frank Aboussafy, official organizer of junior and juvenile hockey in Coleman, stated to The Journal that arrangements have been made with the minor teams to have the arena registered all schools wishing to register for places in the hockey teams this winter. Boys over school age may register. Mr. Aboussafy's store, Aylmer, number 10, will be open at the present time to form three peeewee teams, as well as older boys' teams.

LEAGUE TAKING SHAPE—EN- QUIRIES FROM OTHER TOWNS.

A letter was received this week by Joe McDougall, president of Crows Nest Pass Intermediate Hockey League, from a member of Clark asking the same to be included in the list this year. Michel is definitely out of the picture, the arena there being badly in need of repair with no organization in charge of raising funds. Blairmore is likely to place a team in the league, having a meeting within the next two weeks to discuss the matter. Bellevue is still undecided. Coleman is only club with the exception of Princeton to have reason of placing a team, is marking time until Blairmore and Bellevue come to a decision.

Local News

Mrs. James Fraser was a week-end visitor at Lethbridge.

Mrs. R. Dunlop was the guest of Mrs. A. J. Blair of Lethbridge over the weekend.

Mrs. A. Dowar visited her daughter Mrs. R. Donaldson at Lethbridge during the week-end.

Mrs. T. B. Smith, accompanied by her niece, Miss Smith, were week-end visitors at Lethbridge.

Mrs. Rodfern, of Passmore, was visiting Mrs. George Derbyshire for a few days this week.

A surprise party was held at the home of Mrs. J. Clark, of Coleman, last Thursday evening, in honor of Miss Anne Nichols.

Mr. and Mrs. Luke Lindoe spent a few days here this week. For some months they have been travelling, since Mr. Lindoe resigned from International Co.

Everybody welcome to come to the United Club Supper at St. Paul's United Church on Oct. 27, at 5:30. Adults 35c; children 25c.

The handsome Coronation cake donated by Hunter's Bakery to the Coleman Girl Guides, was sold on Saturday at Pattinson's Hardware. Mr. R. F. Barnes made the draw, the winner being Mrs. H. Hillary, Sixth street. QUALITY IS MOST IMPORTANT FACTOR

Imitation is the sincerest form of flattery. That is why imitations and substitutes for the real thing always fall flat. Quality always counts against inferior quantity production, no matter what the line may be. That's the reason weekly newspapers are valued by national advertisers and enterprising local retailers.

Mossfeldt Disqualified

(Continued from Page 1)
Oscar with a body press and toe hold to win the second fall.

The third and final fall had only been underway a short time with Mossfeldt having the better of the exchanges. Referee Pogson took objection to some of the holds used by him and intervened, only to be thrown to the mat twice. He promptly stepped in and awarded the match to Puckett by disqualifying Mossfeldt.

Hillcrest fans took strong objection to the referee's decision and an argument took place between them and the referee. Hillcrest claim they pay money for transportation to Coleman plus their entrance fee to see these cards, and in both wrestling matches staged here this season the main event has been rudely halted by Referee Pogson disqualifying one of the contestants.

Hockey Players

(Continued from Page 1)
teams governed by the B.C. Amateur Hockey association and should they win the Kootenay playoffs let them represent the league against Vancouver and against the rest of the provincial winners. In this way it would mean Allan Cup hockey from the first whistle right until the final whistle in the last game of the playoffs and points would mean whether teams entered the playoffs or not.

Lethbridge is expected to vote against the proposal, which has been re-opened by Trail and Rossland on the insistence of their fans, while Coleman will vote against it. Coleman takes the stand that it is boosting senior hockey with the object in view of winning senior Alberta playoffs. They also will gain more playoff games in the Alberta division than in B.C. who have an undoubted stronger opposition than Alberta. Coleman, however, have stated to the league that regardless which way the vote is decided they will support it wholeheartedly.

Alex. Easton, who has been employed by the hockey club to act as caretaker and janitor of the arena this winter, started at the same day to clean up and make repairs. The south side of the roof will be repaired. It is at the present time being considered by the rink company if it would be advisable to repair the whole roof with a covering of tin. Inside the arena the board fence surrounding the playing area will be whitewashed while the walls will be painted white in order to give brighter illumination for the games.

For pure destructiveness some people are hard to beat. On inspection at the arena last week it was found some person had ripped one of the goal nets to shreds with a knife, which will take approximately ten dollars to replace.

IMPORTANT NOTICE

The undersigned announces that he is not in any way connected with Coleman Co-Operative Association, and hereby gives this as notice of same.
